

Project Information

Project name: AC Hotel by Marriott Manchester Salford Quays

Location: Manchester, UK

Colours and quantity:

Turquoise Blue – 1275 m²

Smoke Silver Metallic – 1638 m²

Dark Grey Metallic – 1680 m²

Copper Metallic – 247.5 m²

Brief introduction:

Futural was not the original specification for this project, but its massive UKAS reports proved its complete compliance against UK regulations and offered great confidence to the main contractor and the installer, they therefore requested large sample sheet from the manufacturer to run tests.

After careful inspection and tests, Futural's high quality was confirmed, especially the delicate coating performance without "orange peels" against the original specification, (see pic on page 2), the specification was then changed without concerns.

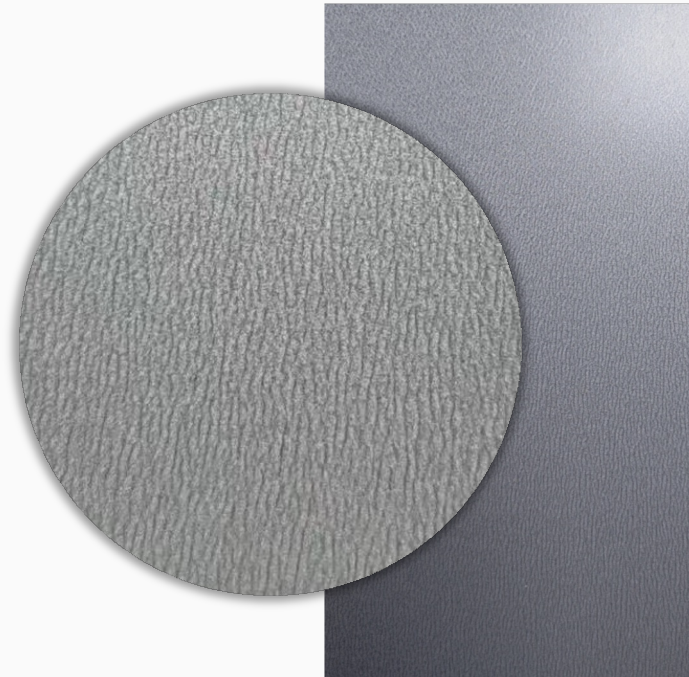

Futural completed the project without compromise in both quality and designs, meanwhile it brought significant cost savings to all parties.

COATING SURFACE

**Futural
Delicate**

**Other brand
Orange peel**
